TOWARD THE MODERN KITCHEN

Meal machine, experimental laboratory, status symbol, domestic prison, or the creative and spiritual heart of the home?

TOWARD THE MODERN KITCHEN

Pre-Standardization
An early proponent of applying design to a kitchen

COPPER

Copper was the first metal mined and crafted by man, and has been the most important one in the oldest times of history.

COPPER

Important in Architecture and Industry
Waterproof _ Excellent brazing and soldering properties.

COPPER

Important in use in kitchen and evolution of cookware_

_ The highest thermal conductivity

Copper 401 W/m*K
Aluminum 237 W/m*K
Cast Iron 80 W/m*K
Carbon steel 51 W/m*K
Stainless steel 16 W/m*K

_ Antimicrobial

_ Biostatic

_ Corrosion-resistant

_ 100% recyclable

_ Oxidation process as reaction with atmospheric oxygen:

COPPER

Copper, a pure and timeless material largely unspoiled by trends is chosen to express the basic traditional values...
